Clinical milestones of complement inhibitors by drug and indication
eculizumab – paroxysmal nocturnal hemoglobinuria
eculizumab – atypical hemolytic-uremic syndrome
eculizumab – myasthenia gravis
eculizumab – neuromyelitis optica
ravulizumab – paroxysmal nocturnal hemoglobinuria
ravulizumab – atypical hemolytic-uremic syndrome
ravulizumab – myasthenia gravis
ravulizumab – neuromyelitis optica
ravulizumab – COVID-19
ravulizumab – glomerulonephritis
ravulizumab – IgA glomerulonephritis
pegcetacoplan – paroxysmal nocturnal hemoglobinuria
pegcetacoplan – age-related macular degeneration
pegcetacoplan – complement 3 glomerulopathy
pegcetacoplan – membranoproliferative glomerulonephritis
pegcetacoplan – glomerulonephritis
pegcetacoplan – C3 glomerulonephritis
pegcetacoplan – dense deposit disease
avacopan – granulomatosis with polyangiitis
avacopan – microscopic polyangiitis
sutimlimab – cold agglutinin disease
avacincaptad – age-related macular degeneration
pozelimab – protein-losing enteropathy
pozelimab – myasthenia gravis
pozelimab – age-related macular degeneration
zilucoplan – myasthenia gravis
iptacopan – paroxysmal nocturnal hemoglobinuria
iptacopan – IgA glomerulonephritis
iptacopan – complement 3 glomerulopathy
iptacopan – membranoproliferative glomerulonephritis
iptacopan – glomerulonephritis
iptacopan – atypical hemolytic-uremic syndrome
iptacopan – myasthenia gravis
danicopan – paroxysmal nocturnal hemoglobinuria
danicopan – membranoproliferative glomerulonephritis
danicopan – glomerulonephritis
danicopan – C3 glomerulonephritis
danicopan – complement 3 glomerulopathy
danicopan – dense deposit disease
danicopan – age-related macular degeneration
crovalimab – paroxysmal nocturnal hemoglobinuria
crovalimab – atypical hemolytic-uremic syndrome
narsoplimab – transplant-associated thrombotic microangiopathy
narsoplimab – glomerulonephritis
narsoplimab – IgA glomerulonephritis
